

GoldMine 2019.1 Compatibility Matrix

The following is an overview of current compatibility for GoldMine 2019.1.

GoldMine Premium Edition and GoldMine Connect must be the same version (**2019.1.0.xxxxx**) but build numbers (2019.1.0.yyyyy) are not required to match.

GoldMine Premium Edition must be installed first on the server where GoldMine Connect will be installed. This installation of GoldMine Premium Edition can be the main server installation, or it can be a client installation of the main installation on another server.

GoldMine Premium Edition only supports synchronization between systems of the same version and build number.

Please note that any operating system or application that is not listed has not been tested and is not supported. Ivanti does not provide integration support for third-party applications. We do not support any application or operating system that is in BETA or that has not been thoroughly tested by our Quality Assurance (QA) team.

For supported products, service packs released prior to the matrix date are supported. This document will be updated with information as it becomes available. For more information, please contact GoldMine Support - <https://www.goldmine.com/goldmine-support/>.
