If a 64-bit version of Exchange is used, then GoldMine must be installed on a different system in order to install GISME. If Exchange is installed on a different system, GoldMine can be installed on a supported 64-bit server operating system and used with GISME.

Note: There are two available builds for GISME 2.1.2. GISME 2.1.2.9 is used when installing on Windows Server 2008. GISME 2.1.2.4 is used when installing on Windows Server 2003.

Note: GISME 2.1.1 currently does not support Windows Server 2008.
