What's Fixed in GoldMine Version 2023.4

GoldMine Premium 2023.4.0 / GoldMine Connect 2023.4.0

78261	GoldMine Link for Microsoft Outlook - When a Sent email contains the X500 address instead of the email address >> Linking the email from the Sent Items list fails but opening the email and link it works
86088	When emails are stored with non-printable - CHAR(0X01) - CHAR(0X1F) - GoldMine Web cannot display the body of the email and states [None - RECID unavailable] instead
87449	GoldMine Link for Outlook - Usually on first Outlook start in the morning or after a weekend Emails will not auto-link.
87465	GoldMine Plus for Microsoft Outlook: E-Mails remain in the Pending tab when the email is sent to many recipients using GoldMine Plus with auto-linking at the same time (e.g. Distribution list emails)
87645	Emails sent from iOS mail (e.g. from an iPhone or Mac from Google) and that are linked with GoldMine Plus or GoldMine Link for Microsoft Outlook >> The TO and CC recipients are reversed in the linked email within GoldMine
89809	Meeting requests will scramble special characters - The email looks many times ok but the Calendar activity does not show correctly.
89883	Merging Contact Records - The oc: information in the CONTHIST>REF field is not updated but amended on short references
90578	GoldMine Plus for Outlook - Usually on first Outlook start in the morning or after a weekend Emails will not auto-link.
90820	GoldMine Plus Office: Microsoft Word closes very slow with the add-in active but not when the add-in is not active
90939	Outlook could not be initialized error when trying to sync with Outlook
91147	Inconsistent Details/Links handling in Contact >> Tab Links and Opportunity/Project >> Tab Details/Links
91259	When using the Show Active in Opportunity Manager: Newly created or changed opportunities do not show up in the list
91344	Tools > Users' Settings… > Properties of a user > Tab Time Clock sometimes absurd amount of Keys and Clicks are displayed
91623	Email Center: On new messages (e.g. replies) body appears grey or white and needs to be highlighted to be displayed
91627	Email Center - Attachments are not visible when the underlying file has been moved or removed
91696	GoldMine Link for Microsoft Outlook - Users link manually sent e-mails to GoldMine with attachment(s), the email links to GoldMine but many times does not link the attachments (neither on file server nor as the email attachment reference)
92173	Synchronizing numeric fields with decimals will round the field content on the retrieving side
92374	Notes Tab: Sporadic no content visible when trying to edit existing Notes
92627	Terminal Server - GoldMine Plus for Word/Excel - Performance issue when starting Word with GoldMine Add-in activated (takes more than 30 seconds without a mail merge)
92935	The tab of the email changes when the autosave draft is active along with Show Next message after delete/complete active and Complete original message not active
93452	Activity list >> E-Mail >> Filed does not refresh (or selecting date or user) >> Eventlog errors indicate Ambiguous column name 'CREATEBY' (also possible LASTTIME, LASTDATE)
93790	Case Tasks with alarms and certain colors assigned will show in Alarm notes E-mail body unavailable
93835	The subject is cut off in the E-mail Center when the From Friendly name and the subject of an email exceed 100 characters
94070	GoldMine Link for Outlook: When an attachment (e.g. an Outlook item) has a tab in the name, Link email failed message with Error in StgCreateStorageEx: STG_E_INVALIDNAME in the Log file

94124	GoldMine Web - Reply to all does not bring over additional TO recipients from the original email into the new email
94469	GoldMine Link for Outlook: A user having permission to access another user's mailbox (tested with Office 365), although auto-linking is not set at all (for both users), the email will be linked under the user accessing the original sender's mailbox
94758	Auto-saving drafts feature causes emails to be completed, although the user does not expect this as they dismiss the draft email
